

'C' Minor Scale Positions (Natural) - Piano Tutorials

Notes: C-1, D-2, D#-3, F-4, G-5, G#-6, A#-7, C-8

Since it is a 'C' minor scale obviously 'C' will be first note, how to find the remaining notes ?

The simple formula which is used for any natural minor scale:

Tone-Semi tone-Tone-Tone-Semi tone-Tone-Tone (T-S-T-T-S-T-T)

What do you mean by Tones and Semi tones?

Tone (whole step) – If there is a one key between two notes, then the distance between those two notes is Tone or Whole step.

Eg: from A to C# is a Tone or Whole step

Semi tone (half step) – If there are no keys between two notes, then the distance between those two notes is Semi tone or Half step

Eg: from A to A# is a Semi tone or Half step (Immediate keys)
